

Bench Vise

Product Catalog

Bench Vise

Bench Vise

The Scarb® Bench Vise is a robust and versatile tool designed to securely hold workpieces in place during a variety of machining, woodworking, metalworking, and crafting tasks.

It typically consists of two parallel jaws, one fixed and one movable, which are tightened together using a threaded screw mechanism. This allows users to clamp and immobilize workpieces of different shapes and sizes, providing stability and precision during drilling, sawing, filing, grinding, and other operations.

Applications

- Woodworking
- Metalworking
- Machinery
- Welding
- Bending
- Pipe Fitting
- Plumbing
- Electronics Repair
