Brass Non-Spark Scraper

Brass Non-Spark Scraper

The Scarb® Brass Scraper is a precision tool designed for a variety of scraping and cleaning applications, particularly in delicate or sensitive environments where traditional metal scrapers may cause damage.

Brass scrapers are primarily made from brass, a copper-zinc alloy known for its softness, corrosion resistance, and non-sparking characteristics.

Used in various industries and tasks, including removing gaskets and sealants, cleaning surfaces before painting or bonding, deburring metal edges, and removing rust and corrosion.

Features

- Non Magnetic
- Non Corrosive
- Stiff Blade
- Comfort Grip
